Does your child receive educational assistance at school? Would they benefit from one-on-one support within camp? To ensure your child has the best possible experience & receives the support they need within camp, families are encouraged to take the initiative in arranging additional support prior to program participation. The Supported Child Development Program through VIHA works with families to provide consultation & extra one-on-one support if needed. Please refer to their website for more details! We recommend contacting them early as support demands are high.
